- Mobile APP for Guards and Residents
- Multi-Lingual Support
- Dedicated calling buttons
- Customizable Screens
- Cloud Services
- EFT Billing Services
- Automated Updates via Internet
- Secured Remote Access for Property Managers
- Access/Elevator/Intercom Integration

When used indoors, the Angled Pedestal is a great replacement for older prefabricated pedestals and adds a modern look to your building. It is definitely a showpiece when greeting visitors.

Its design accommodates views for all visitors, including those in wheelchairs. The ability to add flush mount reader and wheelchair paddle rounds out the offering. A 19" Portrait sized Gesture Controlled Touch Screen allows for effortless interaction. Multi-lingual capability, themed screens, slide shows, screen savers, News/Weather information further enhance the user experience.

Every EP1040 is equipped with a built-in camera which may be Accessed for the purposes of streaming video to a Condoplex Workstation or as an alternative to modulated channels for Video verification during visitor calls.

Mobile iOS / Android APPS

Residents, Guards and Building Staff may receive calls on regular Phones or through a Mobile APP which provides two-way Audio and Video communications with a Visitor at the Entry Panel. The APP provides Caller ID detailing the site name and location of the Entry Phone. Easy to understand icons are presented to release doors or elevators. Guards may receive also calls from on-site video intercom stations. Guard Workstations are provided with a "Speedial" function to quickly contact residents. A caller ID of "Guard" will appear on the resident's APP.

ELP 1040AP/EF/IO

Monolithic Pedestal Visitor Entry Phone System

Centralized User Interface & Extended Calling Features

The EP1040 is much more than a simple dialer-type product. It can become the main communications Hub in your building for multiple Entry Panels, Intercoms, Emergency Stations and Mobile devices. Calls can never be lost as they are placed into a queue until the guard is free to answer. An extensive log, details, when and where calls originated, who answered and actions taken. The system is quite capable of providing Full Access and Elevator Floor Restriction with door/floor release during calls.

VistaDial Services

We have engineered VistaDial Services as a platform for property managers to administer their site. By logging into VistaDial, managers will have secure remote access to make directory changes, view live streaming video, open doors or configure slides on their Entry Phone screens. Managers may also authorize services, set staff access to the site, examine equipment inventory, review and print invoices. VistaDial will calculate monthly fees based on the services chosen by the manager and process payments through Electronic Funds Transfer(EFT).
